The approximate Canadian dollar equivalent distribution rate for HEA is \$0.07253 per unit. For unitholders who hold the Canadian dollar-traded HEA, distribution payments will typically be converted to Canadian dollars by the unitholder’s account holder.

Each ETF does not have a fixed distribution but pays distributions monthly. Distribution rates are generally based on the average current volatility of the securities held by the ETF, along with any dividend income received, less expenses payable by the ETF. The amount of monthly cash distributions are expected to fluctuate from month to month, and there can be no assurance that an ETF will make any distributions in any particular month or months. Monthly distributions will be paid in cash, unless the investor has chosen to participate in the ETF’s reinvestment plan.
